

Part No. ALL56364

Bushing Style Pull Bar (Single Shaft)

Torque link uses energy absorbing polyurethane bushings to absorb engine torque and increase traction to rear tires. Includes two blue (80 durometer) poly bushings on the engine torque side and a single red (87 durometer) poly brake bushing. These durometers work well for a majority of racers, especially those running open class mods such as UMP and USMTS cars. Other bushings are available for unlimited tuning options. Unit is 15-1/2" long overall and most commonly used with two 3/4"-16 rod ends (1-RH Male and 1-LH Male) and a 3/4" suspension tube. Subtract 18-1/2" from center to center of the chassis mounting distance to determine required tube length. 9.23 lbs.

Replacement Parts:

- ALL99190.....Main Shaft
- ALL99191.....Stand Off Tube 10.25"
- ALL56378.....Poly Bushing Blue 3.375" O.D.
- ALL56374.....Poly Bushing Red 2.250" O.D.
