

**Part No. ALL52128**

## **Clamp-On Steering Column Bracket**

Aluminum bracket clamps to 1-3/4" tubing and is 7-1/2" center to center. Mounting bolts face the seat, so the driver can easily adjust the column up and down while sitting in the seat. An oversize rod end (sold separately, ALL 52132) mounts horizontally through a 3/4" hole, allowing some left to right adjustment without moving the bracket or notching the interior panel.
