

Part No. ALL11300-ALL11302

Air Jack Kits

The air jack system fastens directly to your chassis and uses air pressure supplied by a nitrogen tank to raise your entire car in seconds! Kits include four cylinders with a 11.75" or 15.25" stroke length, cylinder mounting rings, air coupling with receiver, installation kit, safety stands and detailed instructions. Air jacks have a 3000lb capacity.

Note: A nitrogen tank, hi-pressure regulator and an air hose rated at a minimum of 400 PSI is required for operation.

Part No.	Description
ALL11302	Kit w/ 11.75" Stroke Cylinders
ALL11300	Kit w/ 15.25" Stroke Cylinders

Replacement Parts:

ALL11315	Air Jack Cylinder 11.75" Stroke
