

Part No. ALL26014
ALL26015

Air Cleaner Stud Kits

Kit includes all components needed to attach an air cleaner assembly onto a carburetor including a 6" long 5/16"-18 threaded stud, an adjustable threaded stop and an air cleaner nut with a O-ring seal. The adjustable threaded stop allows the air cleaner lid to be secured against the stop without crushing the air filter.

Note: This kit is designed for use on carburetors with 5/16"-18 air cleaner stud mounting bosses
