

Part No. ALL38121
ALL38122

Universal Engine Mid-Plates

Universal plates are positioned between the engine and transmission to provide a mid-engine mounting location and help stiffen the chassis. These mid plates are great for drag racing and street cars allowing easier engine or transmission removal and installation of engine/transmission into almost any chassis. Plates fit most GM V-8 applications and measure 15"H x 29"W.

Part No.	Description
ALL38121.....	Steel (.090")
ALL38122.....	Aluminum (.250")
