

Part No. ALL38142  
ALL38143

## Universal Dragster Front Motor Plates

Universal width motor plate includes separate frame saddles for the motor plate to rest on allowing installation of engine into any width dragster style chassis. Saddles feature machined flats which allow the engine plate to rest directly on the saddle securing the motor plate between the saddle and the existing frame mounting tab. Motor plate is 1/4" thick and includes saddles for chassis up to 1-3/8" in diameter. Note: Drilling will be required to fasten saddles and motor plate to existing frame mounts once plate is positioned on frame.
