

Part No. ALL48010

Brake Shut-Off Valve

Disable right front brake with the flip of a switch. Commonly found on dirt modified and late models, electric shut-off helps turn the car on entry when track conditions are heavy/wet. Kit electronically disables the right front brake yet allows brake pressure to bleed-off from the right front brake caliper, unlike manual shut off valves.

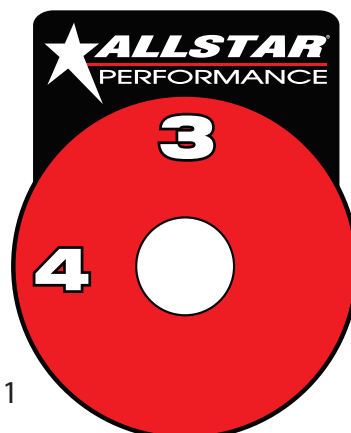

Dimension: 1/2" W x 1-3/4" L x 1-9/16" H.
