

Part No. **ALL48349-**
ALL48427
ALL48465-XX
ALL48466-XX

Coated Braided Steel Lines with Aluminum Ends

Braided steel lines feature a PTFE inner liner which is compatible with all brake fluids and most other fluids and fuels and has a working temperature range of -400°F to 400°F. The braided steel outer covering adds a protective layer against abrasion and is more durable than standard rubber hose. Length stated is from end to end including fittings.

Coated lines feature an external PVC (Poly Vinyl Chloride) coating which is rated up to 185° before discoloration or melting may occur. This will not affect the line integrity, just the appearance of the outer covering. Lines are not DOT approved.

#2 Braided steel lines have a maximum working pressure of 3300psi

#3 Braided steel lines have a maximum working pressure of 3200psi

#4 Braided steel lines have a maximum working pressure of 3000psi

#6 Braided steel lines have a maximum working pressure of 2000psi
