

Part No. ALL56871-ALL56892

Straight Pin Take-Apart Low Friction Ball Joints

Low friction straight pin ball joints are designed to fit spindles with straight-through 3/4" mounting holes. Straight pin design allows height adjustment by relocating the shim stack for more accurate and precise changes versus changing out entire pin. For off road use only.

Note: Machining of most standard spindles from tapered to straight through mounting hole is required for use with this style ball joint.
