

Part No. ALL57806-ALL57809

Precision Lower Control Arm Kits

Precision lower control arms have the same appearance and function as the original factory arms but feature a precision stamping process over traditional reproduction arms providing a true bushing centerline axis. These arms include our popular lightweight steel bushings pre-installed with an alignment rod and include a spacer kit to accurately position each arm to the specific chassis. We recommend tack welding control arm bushings into the arm once the arm has been fitted to the chassis.
