## Weatherproof Toggle Switches

Manual switches for controlling or directing power to electrical components feature a sealed body and toggle lever to help prevent moisture from entering the switch. Switches are rated up to 20 amps and feature #6 terminal screw fasteners.

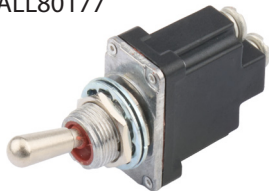

Part No.	Description
ALL80176.....	On/Off
ALL80177.....	On/Off, Momentary Start/Return to Off
ALL80178.....	On/On, Ignition Box Selector for Dual Boxes
ALL80179.....	On/On, Dual Pickup Selector for Distributor or Crank Trigger

ALL80176

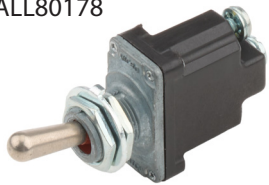

← In from supply power, (typically fused).  
← Out to component or control wire to activate relay. (Terminal 86 on most relays).

ALL80177

← In from supply power, (typically fused).  
← Out to starter relay trigger wire, to activate starter solenoid.

ALL80178

← Out to ignition box trigger wire to activate ignition box #1.  
← Middle Terminal - In from ignition power.  
← Out to ignition box trigger wire to activate ignition box #2.

ALL80179

Note: Popular magnetic pick-up lead wires are violet and green (MSD), keep like colors oriented on same side of switch.  
← Top Terminals - In from distributor magnetic pickup.  
← Middle Terminals - Out to ignition box magnetic pickup.  
← Bottom Terminals - In from crank trigger magnetic pickup.
