

Part No. ALL942502-942585

Series 50 Mid-Air Full-Face Helmets

Snell SA2025 rated full-face auto racing helmets have a classic design featuring a fiber-reinforced polymer composite shell consisting of a fiberglass and Kevlar blend to achieve a balance between light weight and strength. Helmets feature reinforced M6-1.0 HANS/HNR inserts molded into the shell for installation of the proper anchors for the device used and an expanded polystyrene (EPS) liner. The SA2025 rated helmets feature fire-retardant paint, a replaceable Nomex® inner liner and cheek pads, a Kevlar chin strap, and a clear 3mm anti-fog shield with adjustable tear-off posts.

ALL942582

The Series 50 line features a mid-mounted air inlet port which is designed to reduce the chance of hose contacting the vehicle roof while providing adequate clearance for most containment seats. The 1-1/4" barbed inlet port directs air to passageways leading to the top of the helmet and front shield area helping keep the driver cool and the shield clear.
